Summary

I am a final year B.Tech student majoring in AI and Data Science, with a strong foundation in programming, web technologies, and machine learning. I specialize in building full-stack applications, cleaning and analyzing large datasets, and implementing ML models to extract meaningful insights.

Education

B.Tech in Artificial Intelligence & Data Science

Koneru Lakshmaiah University, Vijayawada, India

2022 - 2026

CGPA: 9.47/10

Intermediate (MPC)

Sri Viswa Junior College, Visakhapatnam, India

2022

Percentage: 93.8%

Secondary School (SSC)

Bhashyam Public School, Rajam, India

2020

Percentage: 98.5%

Work Experience

Data Science Intern

EI Systems – Remote

May 2024 – June 2024

- Built a house price prediction model using machine learning, achieving approximately 90% prediction accuracy.
- Applied data cleaning, preprocessing, and feature engineering techniques to enhance model performance.
- Implemented regression algorithms for accurate price prediction.
- Gained hands-on experience in model evaluation and optimization.

Projects

Online Learning Platform

Tech Stack – React.js, Node.js, Express.js, MongoDB

- Built a full-stack learning platform supporting role-based access for students and instructors.
- Implemented secure user authentication using JWT and password hashing with bcrypt.
- Enabled instructors to create, update, and delete courses, and students to enroll in both free and paid courses.
- Designed a responsive UI for smooth navigation and integrated MongoDB for efficient data storage and retrieval.

Serverless Multi-Language Translator

Tech Stack – React.js, AWS Lambda, API Gateway, DynamoDB, Cognito

- Developed a serverless full-stack translator app using AWS and React for real-time multilingual translation.
- Integrated Amazon Translate to support multi-language content translation in the application.
- Used Cognito for secure user authentication and DynamoDB for storing translation history.
- Implemented features like dark mode, responsive UI, and translation history tracking for better user experience.

Skills

- Programming Languages:** Python
- AI/ML:** Machine Learning, NumPy, Pandas
- Web Development:** HTML, CSS, ReactJs, Node.js, Express.js
- Databases:** MySQL
- Cloud & Tools:** AWS(Lambda, API Gateway, DynamoDB, Cognito), Git, GitHub, Postman

Certifications

- Python Programming by IBM
- SQL for Data Science by Coursera

Achievements

- Achieved a 2-star rating on CodeChef for competitive programming.
- Solved 200+ problems on LeetCode, enhancing problem-solving and algorithmic skills.
